

Managed Security Service

Stay Ahead of Online Security Threats

Keeping your websites, apps, APIs, and users safe requires deep expertise and world-class technology to stay ahead of online threats. Akamai integrates proactive monitoring, advisory reporting, fast incident response, periodic tuning, and dedicated security experts in a single managed service with the scale to protect your organization against the largest and most sophisticated attacks – so you can stay focused on your business.

Akamai Managed Security Service

With Akamai Managed Security Service (MSS), you can rest assured that experienced security experts and proven online defenses will help your business achieve a strong security posture.

Proactive monitoring of security events provides early threat detection, and advisory reporting delivers intelligence for actionable insights. If your business experiences an attack, MSS implements the appropriate responses to mitigate active threats.

To address the ever-changing threat landscape, MSS regularly updates security configurations to maintain the highest levels of protection. MSS maps a security strategy to your business needs that integrates industry expertise and best practices – all backed by the global scale of the Akamai Intelligent Edge Platform.

MSS supports Akamai cloud security solutions to prevent harmful bot activity like credential stuffing, scales to prevent large distributed denial-of-service (DDoS) attacks, and detects and mitigates script vulnerabilities.

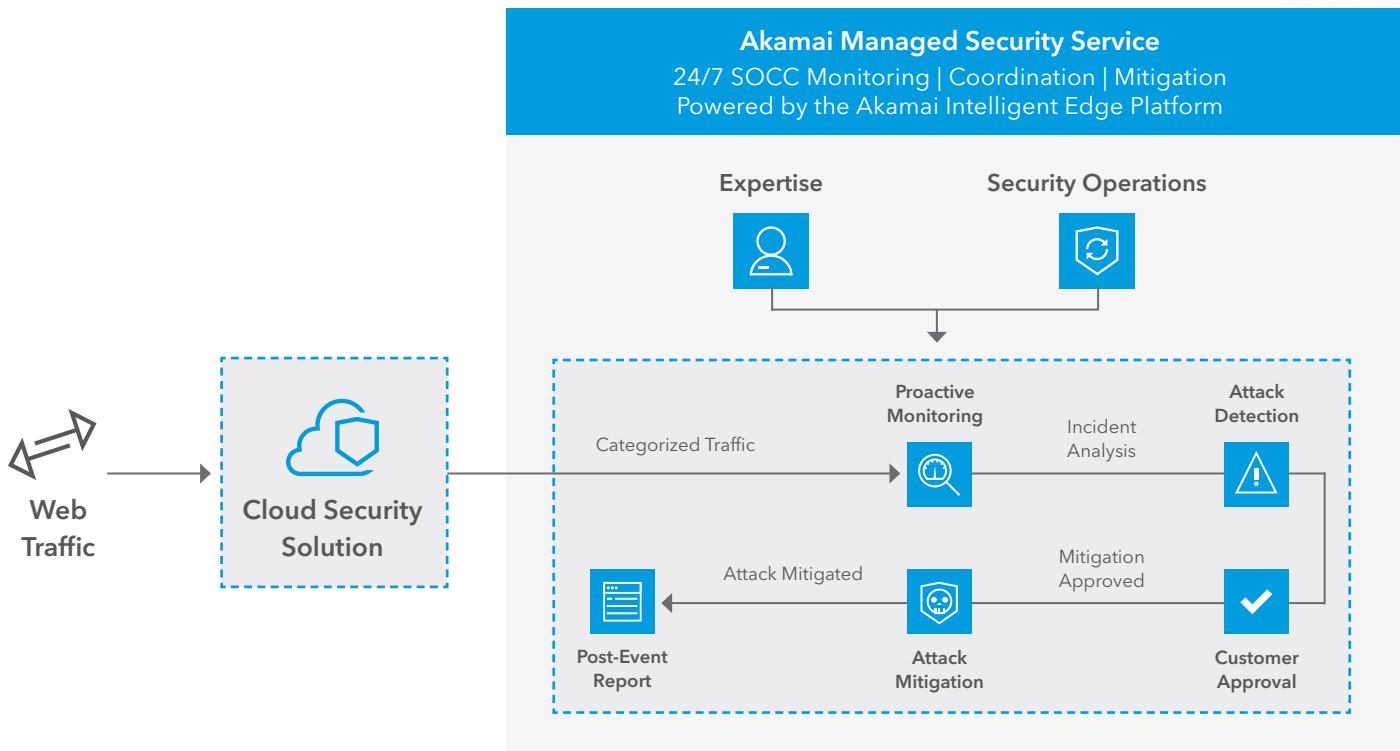

BENEFITS TO YOUR BUSINESS

-  **A single comprehensive managed service** for your security strategy with integrated solutions to minimize risks affecting confidentiality, integrity, and availability of your systems and information
-  **Enhanced protection** with proactive monitoring of behavioral anomalies for early threat detection
-  **Expert-crafted defense** with scalable protection via 24/7 access to the Akamai Security Operations Command Center (SOCC)
-  **Unified insights** and operational efficiencies from our global SOCC provide tremendous visibility into existing and emerging threats, and mitigate attacks faster
-  **In-depth analysis, assessments, and enhanced advisory reporting** provide security intelligence to address the growing attack surface

Managed Security Service

Stay Ahead of Online Security Threats

How It Works

Key Features

Proactive Monitoring

Visibility into online activity is essential for early threat detection.

- **24/7 Monitoring and Anomaly Detection:** Security experts perform real-time analysis to detect anomalies in traffic behavior and prevent potential threats

Security Event Management

Once a threat is identified, it's vital to have experts available for a quick response to mitigate an attack.

- **Response Service-Level Agreement (SLA):** Security experts respond in as fast as 30 minutes or less, depending on issue severity
- **Post-Event Report:** Security experts provide a detailed, in-depth, postmortem report highlighting the attack behaviors and actions taken following an attack or security incident

Managed Security Service

Stay Ahead of Online Security Threats

Attack Readiness

Security configurations must be tuned periodically to defend against the latest threats.

- **Security Health Checks:** Real-time, granular, and quantifiable scores (grades) to assess the health of the security posture of the policies under management
- **Technical Security Review:** In-depth analysis of your security solutions with tuning recommendations
- **Configuration Assistance:** Security experts who help to fine-tune and optimize your Akamai security configurations to align with the current threat landscape
- **Operational Readiness Drills:** Effective communication workflows, escalation paths, and operational agility

Advisory Services

A dedicated security expert familiar with your business goals will provide security intelligence, solution recommendations, and security trends with enhanced advisory reporting.

- **Aligned Security Expert:** High-level customer engagement and security expertise to manage your business priorities
- **Monthly Solutions Report:** Summary of your security activity, overall security posture, fulfillment, and project updates
- **Customer Business Review:** Executive summary of your security activity for a business quarter, value confirmation, industry trends, and product roadmap

Akamai secures and delivers digital experiences for the world's largest companies.
